# Job Openings - Life Science

## DSM Nutrition Center (DNC)

招聘对象: Organic chemistry (有机化学专业, BS/MS/PhD)

招聘方向: Process Research 工艺开发 (2~3人)

招聘职位: Scientist, Associate and Assistant Scientist

招聘要求: Strong organic chemistry background.

招聘对象: Analytical chemistry (分析化学专业, PhD)

招聘方向: Analytics 分析 (1人)

招聘职位: Scientist

招聘要求: Strong analytical chemistry or pharmaceutical analysis background

Please send your CV to [hr.shanghai@dsm.com](mailto:hr.shanghai@dsm.com)

# DSM is everywhere...

Uninvented **DSM**

DSM Dyneema produces Dyneema<sup>®</sup>, a lightweight, super strong high performance polyethylene fiber. Dyneema<sup>®</sup> is an important component in ropes, cables and nets in the fishing, shipping and offshore industries.

DSM Nutritional Products produces vitamins and UV filters for use in the personal care industry.

DSM Coating Resins produces synthetic coating resins for use in the marine industry.

DSM Fibre Intermediates produces caprolactam as a raw material for Nylon-6, which is used in textiles and acrylonitrile, which is a raw material for acrylic fibers.

DSM Engineering Plastics produces insulator materials for LV switchgear and ITE components, lighting fittings and semiconductors, wire and cable, enclosure housings and electrical equipment.

DSM Nutritional Products produces vitamins, antioxidants, enzymes, amino acids and other ingredients for use in the animal feed and pet food industries.

PeptoPro<sup>®</sup>, a sports recovery ingredient, a product of DSM Food Specialties, differs from other sports and energy drinks in that it enables faster replenishment of muscle energy stores.

DSM Melamino produces melamine, which is mainly applied in adhesives and impregnating resins for woodbased panels used in the construction industry.

DSM Fine Chemicals products are used in coatings, resins, dyes, pigments, polymers and plastics all around the world, both as base products and as additives that give the end products special qualities, such as strength, UV resistance and elasticity.

DSM NeoResins produces extremely durable resins specially designed for the marine industry.

DSM Composite Resins produces unsaturated polyester resins, gel coats, straps and bleaches and polymeric glassion for use in glass reinforced plastics applications in the marine industry.
